

Nikola's Cover Letter

When I was very young, my father decided he needed to make repairs on the family car. Soon I was handing him tool while he developed new skills. Later, I developed my repair skills and he was handing me tools.

I have always been interested in how things go together and how to make them work. I trained as an auto technician. Through work experience, I became a heavy equipment mechanic.

My current training as a Biomedical Engineering Technician utilizes my previous skills and allows me to move a new direction. I will bring curiosity, energy, technical skills and passion to an employment opportunity.

Please review the enclosed resume which further illustrates my skills and work experience. I can be reached at 216.965.9999. I would like to discuss a position with you.
